

8 Leg Stand

Assembly Instructions

Anchor Fastener

Assemble top. Use anchor fasteners to connect (6) "D" pieces with TOP SLOT of "A". Tighten down equidistant along the middle.

Use anchor fasteners to connect a "B" on each end of "A", flush with end.

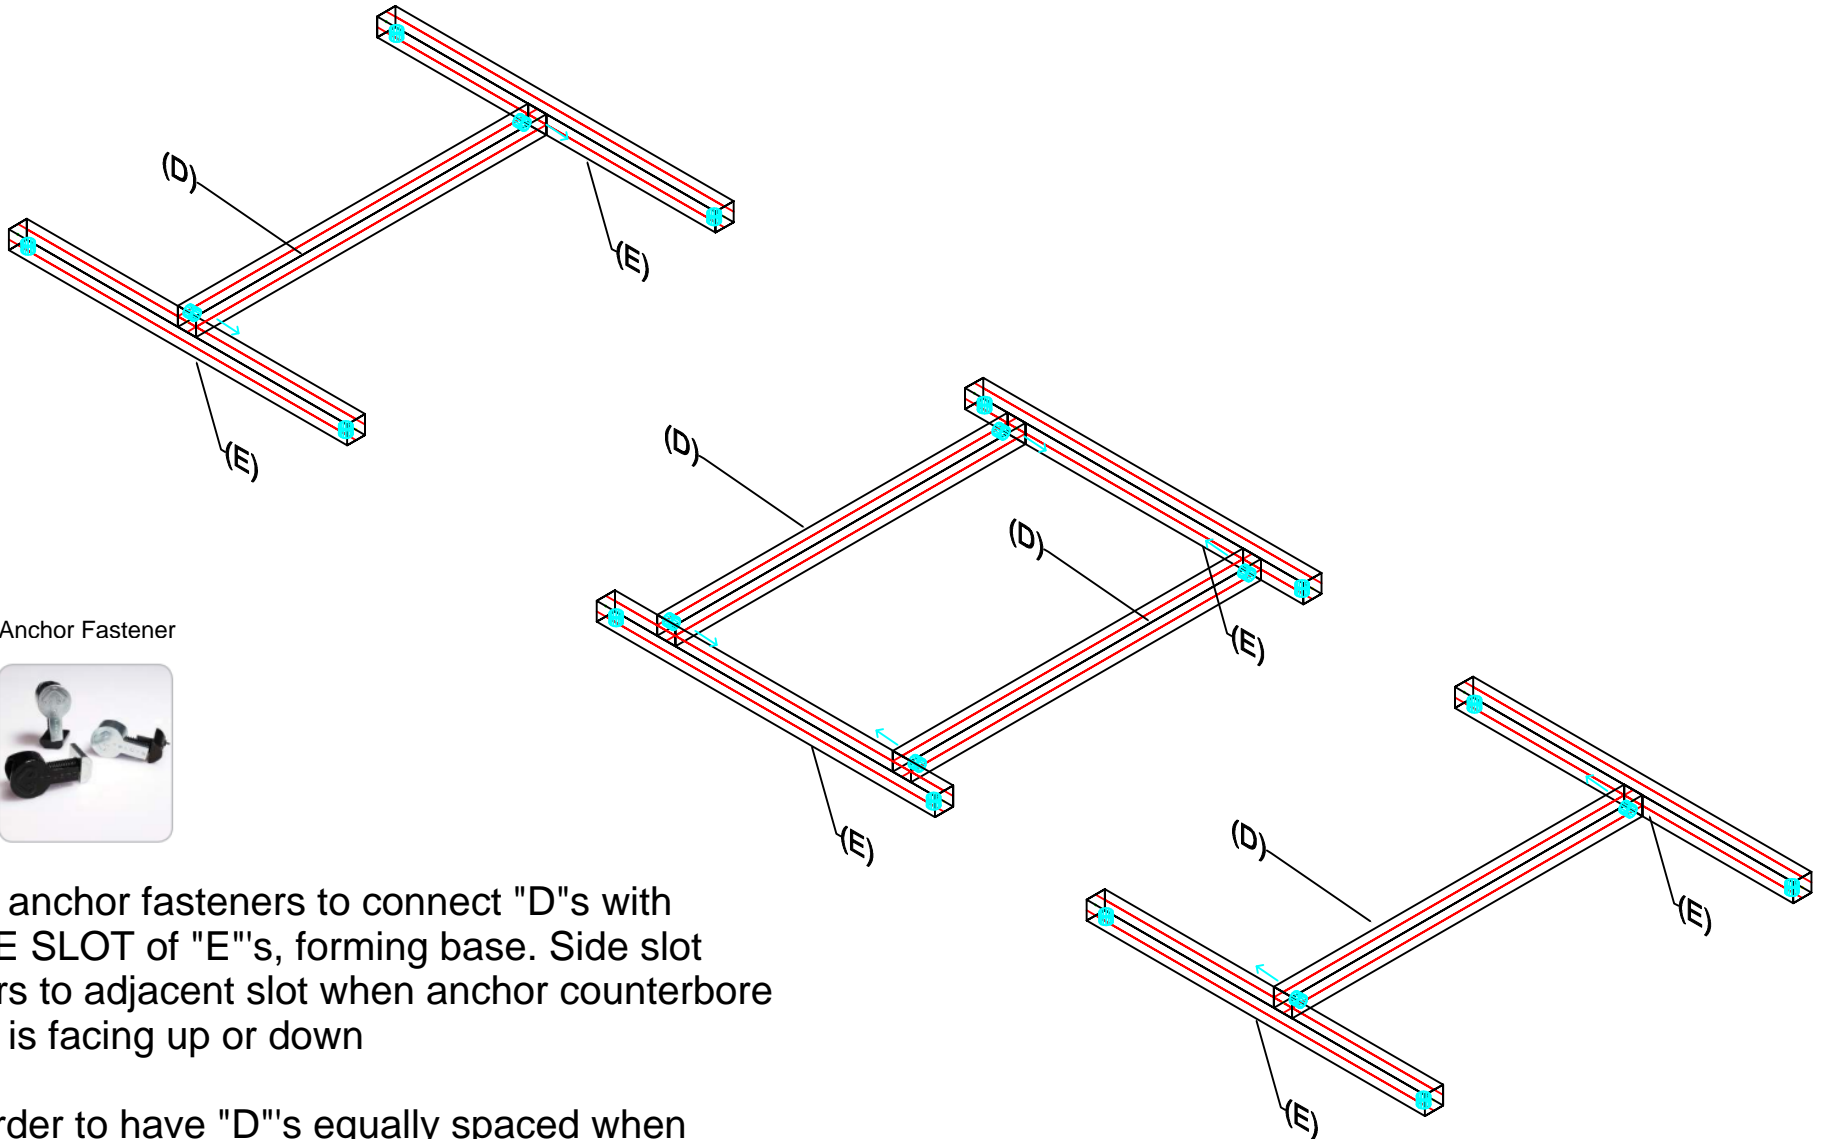

Double Anchor Fastener

Use **DOUBLE ANCHOR FASTENERS** to connect "C" legs with bottom slot of "A". Tighten with equal spacing between legs. Outside legs will be flush with the ends.

Tighten enough to keep legs in place but it will be helpful later to leave slightly loose. May be helpful to assemble upside down and flip entire stand over when complete

3

Anchor Fastener

Use anchor fasteners to connect "D"s with SIDE SLOT of "E"s, forming base. Side slot refers to adjacent slot when anchor counterbore of E is facing up or down

In order to have "D"s equally spaced when base is installed, it is recommended that (2) base units have (1) "D" centered, and middle base unit has a "D" close to each end

4

Attach last of "D"'s to outside slot of leg using anchor fastener. Face anchor fasteners down for full access of top slot.

Attach bases that were made in Step 3 to inside slot of legs using anchor fasteners. It is recommended that anchor fasteners face down for full access of top slot.

(D)

(D)

Use rubber mallet (or handle of T wrench) to gently pound end caps into exposed ends of stand top

5

Finish by using bolts to thread outside holes of foot base plate into the holes at the bottom of the legs.

-Thread Foot Rod into the center hole of the base plate

-Using a rubber mallet or weight of the stand, snap the ball joint of Foot Rod into the round indentation of the Foot Pad.

Base Plate

Foot Rod

Foot Pad

FOR CASTERS: Caster base plate and casters will connect to the legs in the same fashion
